Buinho
In your pocket

Your visual guide to opening, installing and using Welcome to Buinho.

One place for your stay

The house. The FabLab.
The village. The team.

Free to use.
No account needed.

Open the app ↗

Android → page 2
iPhone → page 4

Open this link on your phone

buinho-creative-hub.github.io/welcome-buinho/

You can use it in your browser straight away. Installation is optional.

Add it to Android

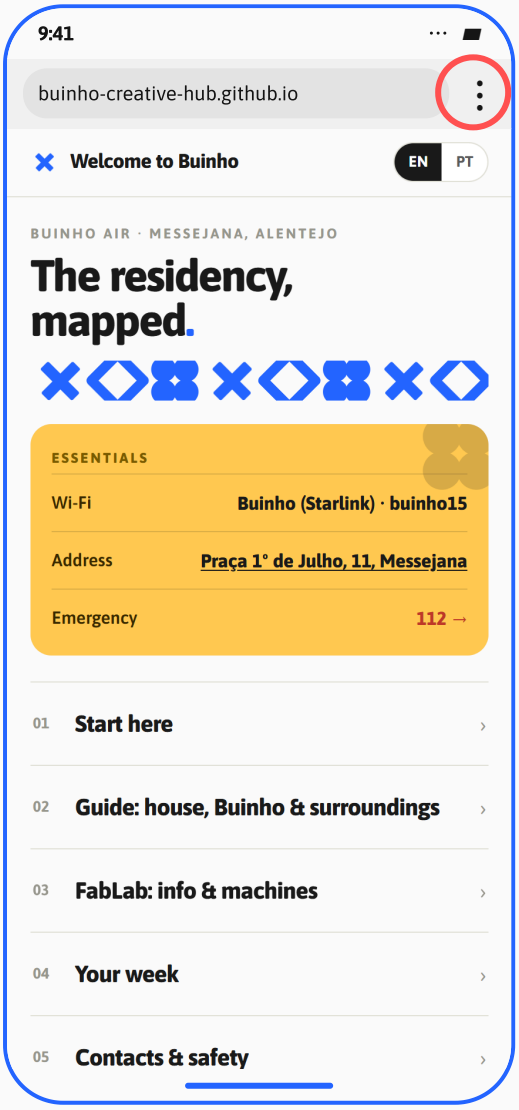

Start with the app open in Chrome on your phone.

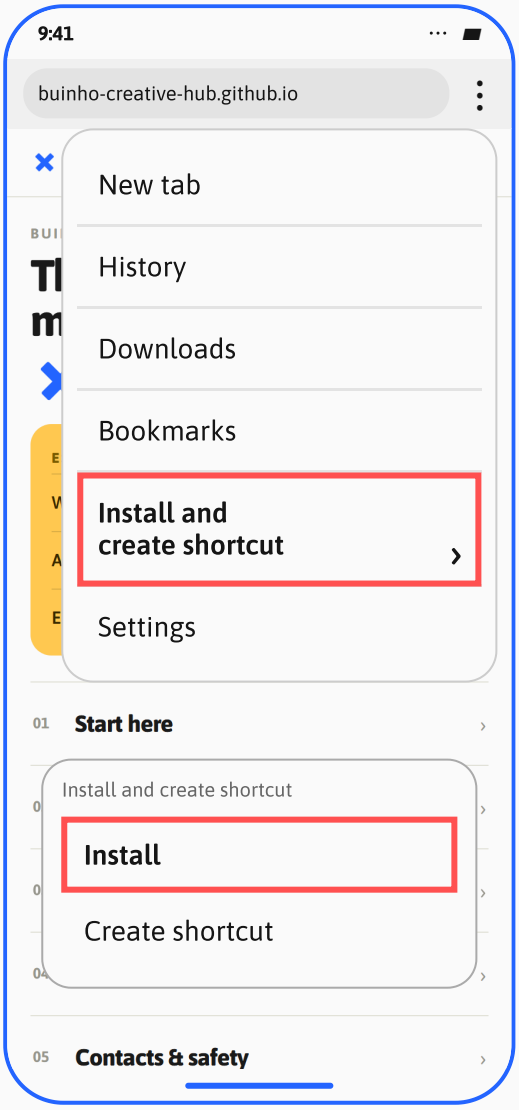

01 Open the app

Tap the app link. Then tap the three dots ⋮ beside Chrome's address bar.

02 Find the install option

Tap **Install and create shortcut**, then **Install**. Older versions may say **Install app** or **Add to Home screen**.

Opened from WhatsApp?

Use the link menu to open it in Chrome, or copy the address into Chrome. The install option may be missing inside another app.

Install then open

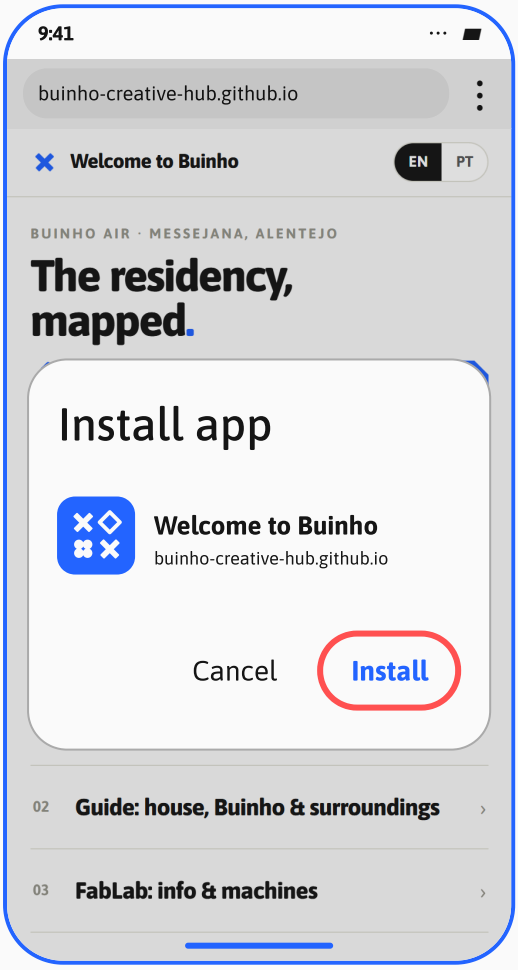

Install the app for its own icon and a full-screen view.

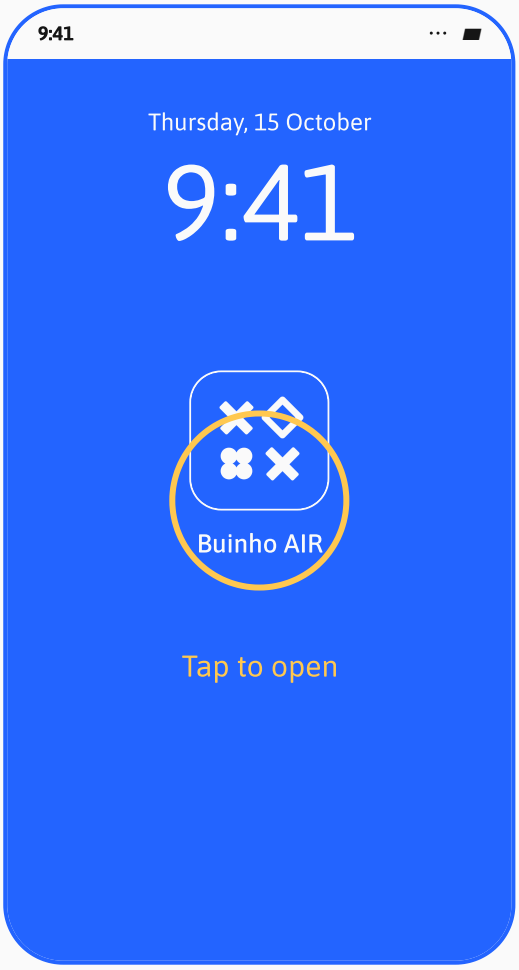

03 Confirm installation

Choose **Install** and confirm. This installs the web app directly from the Buinho website.

04 Tap the Buinho icon

Find **Buinho AIR** or **Welcome to Buinho** on your home screen or in your app list.

Install, shortcut or download?

Choose **Install**. A shortcut may have a browser or arrow badge and open a browser tab.

Chrome's **Download page** saves a webpage; it does not install the app. If Install is missing, use the link or check your app list.

Add it to iPhone

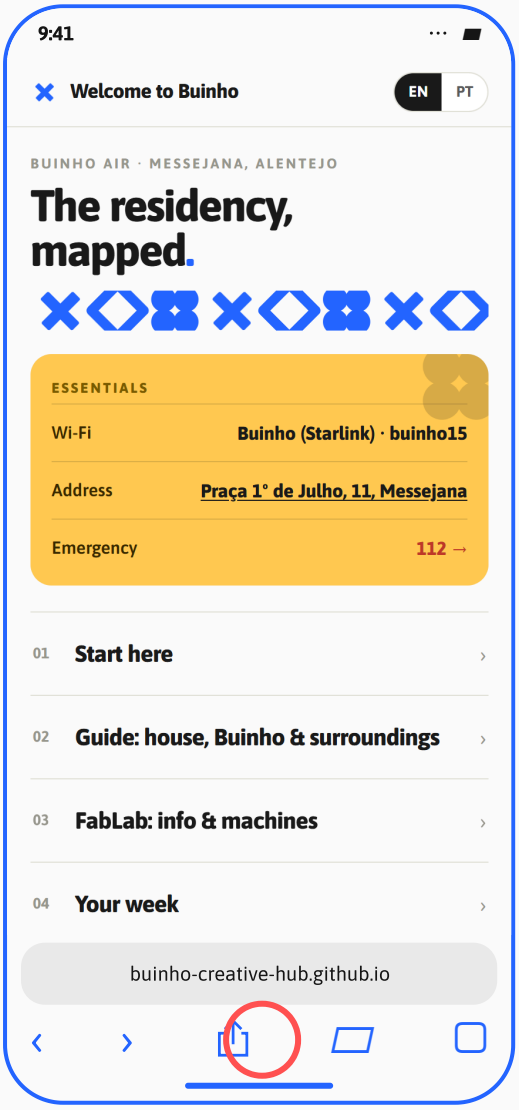

Open the app link in Safari, then use the Share menu.

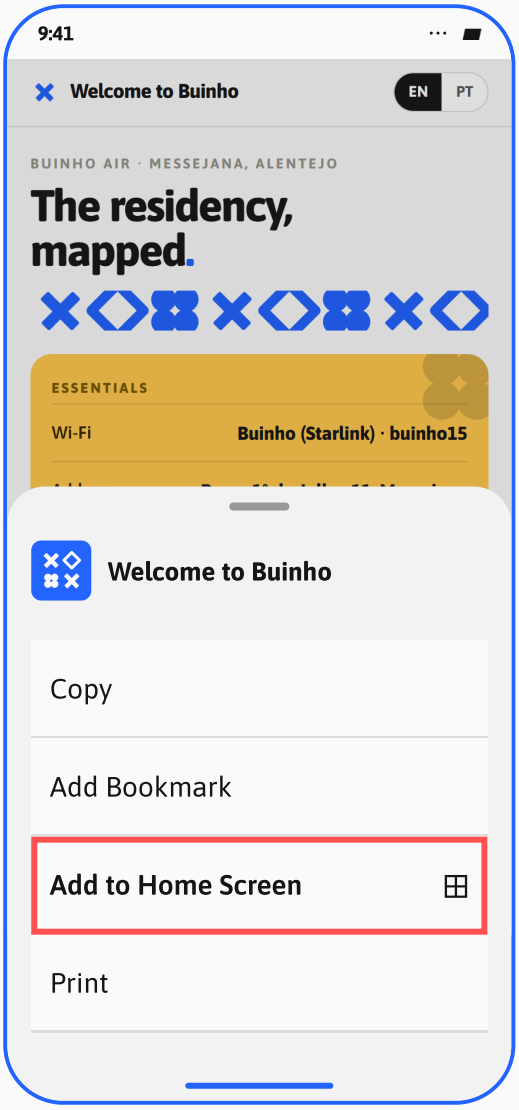

01 Open Safari Tap Share

Open the app link, then tap the square with the upward arrow.

02 Add to Home Screen

Scroll down the Share menu and tap **Add to Home Screen**.

Safari may look different

In the compact layout, open the Page Menu first, then tap Share. If “Add to Home Screen” is missing, scroll to Edit Actions and add it.

Add then open

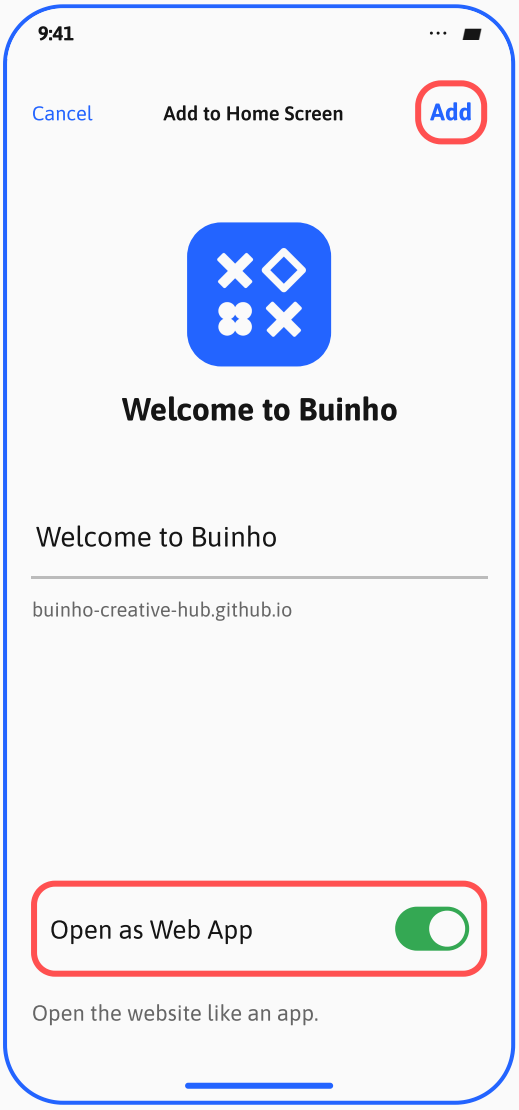

The guide will be one tap away from your home screen.

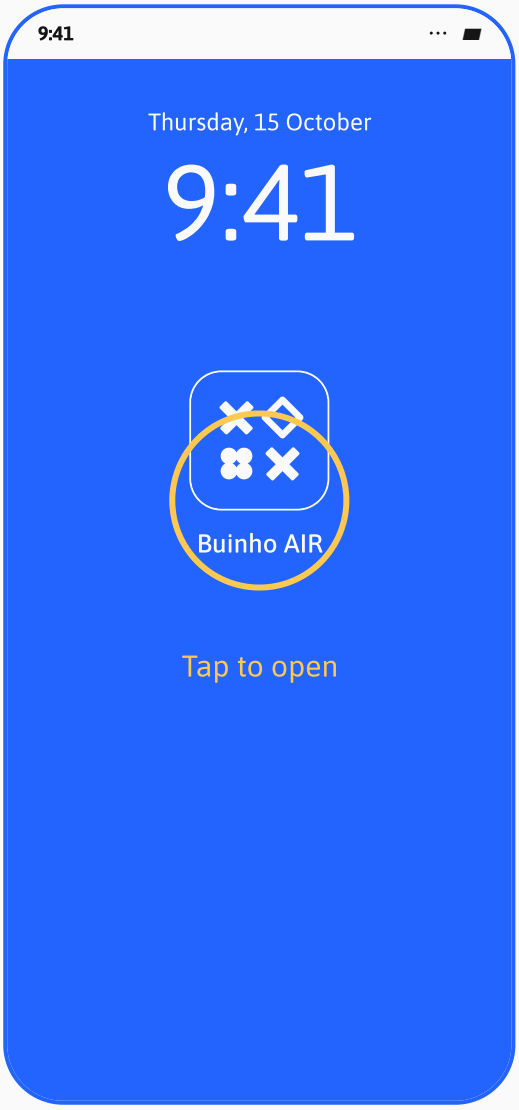

03 Confirm Add

If shown, leave **Open as Web App** switched on. Tap **Add** at the top right.

04 Tap the Buinho icon

Return to your home screen and tap the new blue icon to open the app.

You do not need the App Store

This app installs directly from the website. If you prefer, you can keep using the link in Safari without installing it.

Find what you need

Use the numbered index. Switch language with EN / PT at the top.

01 Start here

Join the AIR WhatsApp group to stay in touch; tell the team when you arrive.

02 Guide

Check the shared guidance on your house, Buinho and village life.

03 FabLab

Check the rules before using equipment. To use a machine, arrange it with the team.

04 Your week

Check upcoming plans so you know when and where to join. Reopen online for updates.

05 Contacts & safety

Find the team's contact details and emergency information.

06 Talk to the team

Send something that needs a person's attention, or share feedback on your stay.

Index

Back to the main menu.

Map

Tap a place, then Go for directions.

Assistant

Ask a practical question in your language.

Ask or tell the team

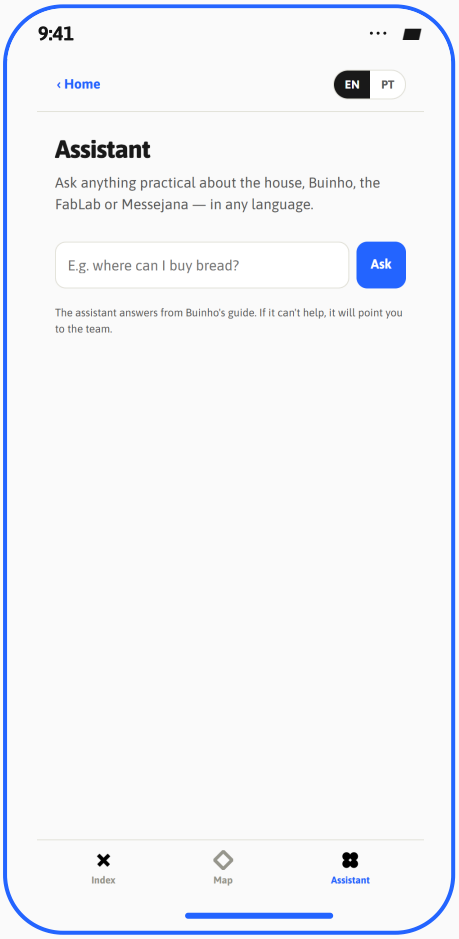

We’re happy to help in person. The app complements that support for everyday questions and messages.

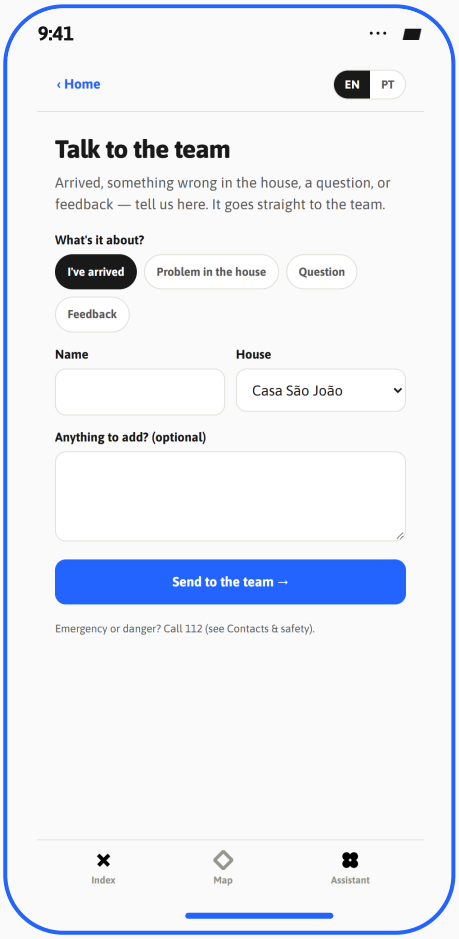

01 Ask the Assistant

A handy extra for everyday questions, such as where to buy groceries, or when HQ is closed after hours. We’re still here to help in person. Tap **Assistant**, type your question and tap **Ask**.

02 Contact the team

If you can’t sort something out in person at the time, use **Index → 06 Talk to the team**. You can also share feedback here. Choose a topic, add your name and house, and send your message.

A request needs a reply

Sending a message does not confirm anything by itself. Wait for the team’s reply. If sending fails, use the WhatsApp option offered by the app.

Keep this bit handy

A few simple tips for a smoother stay.

01

Before you go offline

Open the app, guide, agenda and map online first. The app saves loaded content; installation alone does not download everything. Try opening it in airplane mode before relying on it.

Only map areas already loaded may be available offline. The Assistant, sending messages, agenda updates and directions need internet. A shortcut icon does not tell you what was saved.

02

If something looks wrong

Check your connection, close the app and open it again. If it still shows old content, open the original link in Chrome or Safari.

If needed, clear this site's stored data in your browser settings and reopen it. This also clears saved name and house details.

03

Your information

No account or password is needed. The app remembers your name and house on this phone; they are included when you send a message to the team.

The Assistant uses AI. Avoid personal or sensitive details in questions. Map location is optional and needs your permission.

04

Still stuck?

Ask the Buinho team at the FabLab or write in the AIR WhatsApp group, linked under **01 Start here**.

Emergency or danger? Call 112.
Do not wait for the Assistant or a form reply.

Welcome to Buinho
